Key Reasons To Invest In This Portfolio

- Seeks to achieve long-term capital growth and income with a moderate level of investment risk.
- Ideal for investors with a longer time horizon, a primary objective of capital growth accumulation, and seek an investment that aims to minimize Portfolio losses during periods of down markets.
- Also for investors that are retired or near retirement who seek a greater potential for capital growth.

How Your Money Is Managed

Your Retirement Accumulation Portfolio utilizes a comprehensive multi sub-advisor approach, each with its own unique investment methodology. The Portfolio employs two key protection strategies: reduce equity market exposure during periods of market stress, and invest in global equity securities issued in developed markets that are better insulated from changes in the economy. These key protection strategies are combined with globally managed components in optimally allocated proportions to protect and grow your investment

Effective Currency Exposure

The Counsel Investment Solution may use forward contracts to hedge risk related to changes in exchange rates. Counsel has the discretion to change the effective currency exposure at any time after the date of publication. The current target hedge on U.S. dollar exposure is 25%.

Counsel or the investment specialists have the discretion to change the effective currency exposure at any time after the date of this publication. For information on the Portfolio or the underlying Counsel funds, please read the Fund Facts, Simplified Prospectus and/or other reporting documents before investing, available at www.counselservices.com.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any security holder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.
