**Key Reasons To Invest In This Portfolio**

- Seeks to achieve a balance between income and capital growth with a conservative level of investment risk.
- Ideal for investors who are retired or near retirement and desire an investment that seeks to minimize Portfolio losses during periods of down markets.
- Also for investors with a focus on preservation of capital, who will use this Portfolio as their primary source of savings for their retirement.

**How Your Money Is Managed**

Your Retirement Preservation Portfolio utilizes a comprehensive multi manager approach, each with its own unique investment methodology. The Portfolio employs two key protection strategies: reduce equity market exposure during expected periods of prolonged market stress, and invest in global equity securities issued in developed markets that are expected to be better insulated from changes in the economy. These key protection strategies are combined with globally managed components in optimally allocated proportions to protect and grow your investment.

\*The asset allocation weights depicted above represent the neutral allocations to the Portfolio. The neutral allocation may comprise of a combination of investments in equities, fixed income securities, securities that are designed to track a market index or in other securities.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently, and past performance may not be repeated.
